

FINIS TECH SUITS

REFERENCE GUIDE

HYDROX™

WORN IN 2024 PARIS OLYMPICS

Scan to see the science behind the suit

MEMORYFLEX® FABRIC: The multi-directional weave of our proprietary fabric was intentionally designed to enhance the natural motion of the muscles.

SMART MATERIAL: Enhances flexibility and compression throughout the stroke cycle and returns to its original shape.

CORE STABILITY: Allows for great flexibility and free range of motion while maintaining core stability and balance through the hips.

COLORS: BLACK NAVY WHITE

NEW!

R3 ASCENT

A high-compression race suit designed to feel secure, supportive, and race-ready.

HYDRODYNAMIC SPEED – Advanced woven fabric reduces drag, enhances glide, and improves efficiency in the water.

LOCKED-IN FIT – Controlled compression stabilizes muscles, supports posture, and sustains speed across all events.

ALIGNMENT & LIFT – Strategic hip construction helps position swimmers forward and up in the water, aiding body line and momentum.

COLORS: BLACK

FUSE

Designed for competitive swimmers, with a balance between flexibility and compression

UNIVERSAL FIT: Bonded seams reduce drag and create a comfortable fit for many body types

FLEXIBLE COMPRESSION: High compression fabric with resilient elasticity provides compression without limiting range-of-motion

HYDRO-REFLECTIVE FABRIC: Provides UVA/UVB protection (71% Polyamide, 29% Elastane)

NEW! BLANK STYLE: Logo-free design, perfect for team customization or brand-compliant athletes

COLORS: BLACK NAVY BLACK BLANK
