

FAQ'S

SHOULD I GET THE SWIMMER'S SNORKEL OR THE FREESTYLE SNORKEL?

The Swimmer's Snorkel is our original center-mount snorkel designed to allow swimmers to focus on stroke technique without the interruption of turning the head to breathe. The Swimmer's Snorkel has a one-way purge valve, which helps swimmers get comfortable with a snorkel. The purge valve allows water to flow out of the tube without entering the mouthpiece.

The Freestyle Snorkel features a curved shape specially designed for freestyle. It is more of a technique-driven snorkel that reinforces proper head alignment and will dip below the water level if you are out of alignment. With reinforced stability, the Freestyle Snorkel allows for full range of motion at all speeds, including flip turns.

HOW CAN I SAFELY CLEAN MY SNORKEL?

There are a few different ways you can maintain and clean your snorkel. First, it is important to rinse your snorkel with clean, fresh water after each swim. About once a month, (depending on usage) you can also submerge your snorkel in hot soapy water with a few drops of bleach and rinse with fresh water. It is also safe to run the snorkel, without the head bracket, through a wash in the top rack of the dishwasher.

WHAT SIZE SWIMMER'S SNORKEL SHOULD I GET?

We offer two sizes in the Swimmer's Snorkel. Junior size is suitable for younger swimmers or petite women, especially those new to swimming with a snorkel. The adult Swimmer's Snorkel is suitable for older teens and men and women.
